SUMMARY

Computer Science Engineering student with a strong foundation in software development and hands-on experience in building web and mobile applications using AI-assisted development approaches. Interested in Android development and cloud computing, with a practical interest in emerging areas of AI.

EDUCATION

P.E.S College of Engineering, Mandya, Karnataka

Bachelor of Engineering in Computer Science and Engineering

CGPA: 8.0 (up to 7th Semester) | 2022 – Present

Mandavya Excellence PU College, Mandya, Karnataka

Pre-University (PCMB) – 89.33% | 2020 – 2022

Morarji Desai Residential School, Ganangooru, Mandya, Karnataka

SSLC – 87.36% | 2016 – 2020

PROJECTS

Privacy-First Expense Tracker Application (Personal Project) | 2025 – Present

- Conceptualized and developed a privacy-first expense tracker as a Progressive Web Application (PWA), later deployed as a mobile application using Capacitor, enabling cross-platform functionality from a single codebase.
- Designed an offline-first architecture ensuring all user data is stored locally with zero backend dependency, enhancing data privacy and security.
- Implemented features including expense tracking, category-based budgeting, recurring transactions, analytics dashboards, and multi-currency support.
- Integrated data visualization, local notifications, and export functionality for PDF and Excel reports.
- Developed using AI-assisted workflows and rapid prototyping techniques to build a scalable, maintainable, and production-ready application currently in its pre-launch stage.

E-Commerce Platform (Team Project) | 2024 – 2025

- Contributed to the development of a full-stack e-commerce web application using the MERN stack (MongoDB, Express.js, React.js, Node.js).
 - Designed and implemented RESTful APIs for product management, cart operations, and order processing.
 - Integrated secure authentication using JSON Web Tokens (JWT) and payment gateways such as Stripe and Razorpay.
 - Developed dynamic search, filtering, and an admin dashboard for efficient inventory and order management.
 - Ensured responsive UI/UX and smooth checkout experience across devices.
-

TECHNICAL SKILLS

Programming Languages: Java, Python

Web Technologies: HTML, CSS, React.js

Backend & Database: Node.js, MongoDB, SQL

Tools & Platforms: Git, GitHub, VS Code, Android Studio

Concepts: SDLC, Agile/Scrum, REST APIs, Cloud Computing

CERTIFICATIONS

- Java Programming – Infosys Springboard (2023)
 - Classical Cryptosystems – Coursera (2025)
 - AI-Enabled Intelligent RPA – Employability.life (2025)
 - IBM Introduction to Machine Learning – IBM (2025)
 - Introduction to Applied Cryptography – University of Colorado (2025)
-

EXPERIENCE

Robotic Process Automation (RPA) Intern | Employability.life (Remote)

Dec 2024 – Jun 2025

- Worked on AI-enabled Intelligent RPA solutions using UiPath for automating business processes.
- Automated invoice processing workflows including PDD creation, exception handling, and UAT testing.
- Developed Excel-driven automation and Gmail-integrated email bots to streamline operations.
- Gained practical experience in automation tools and techniques.
